

Message geometry: z-space, message-space, dither noise, and goal confusion

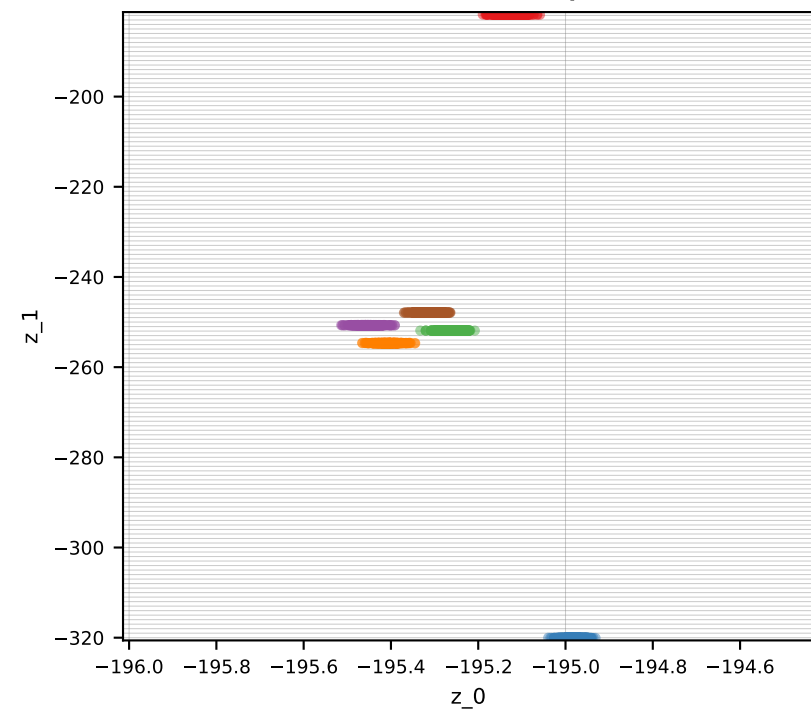

A. z-space (dim 0 vs 1)
Phase 1 (mag anchor)

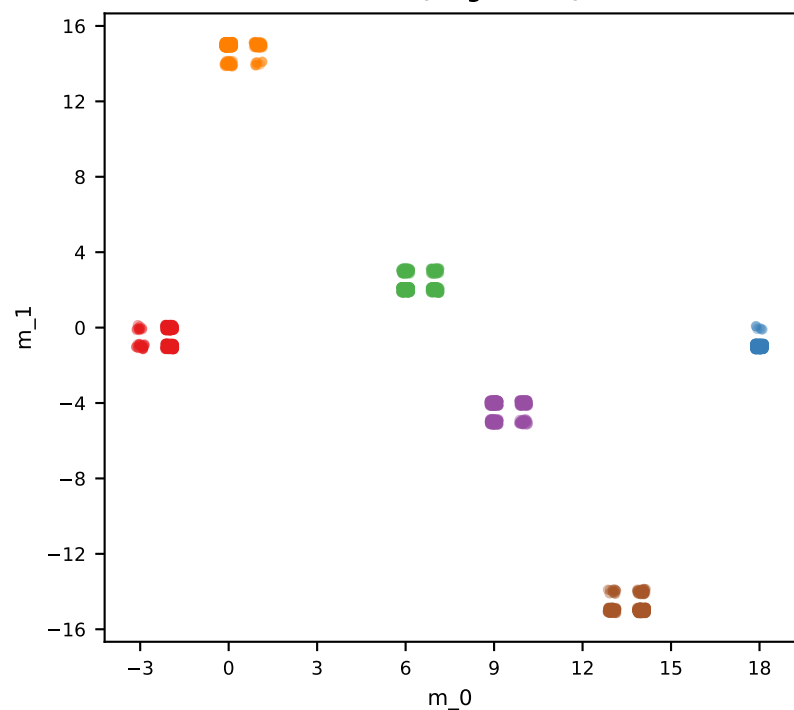

A. z-space (dim 0 vs 1)
Phase 2 ($\lambda=1e-3$, stable)

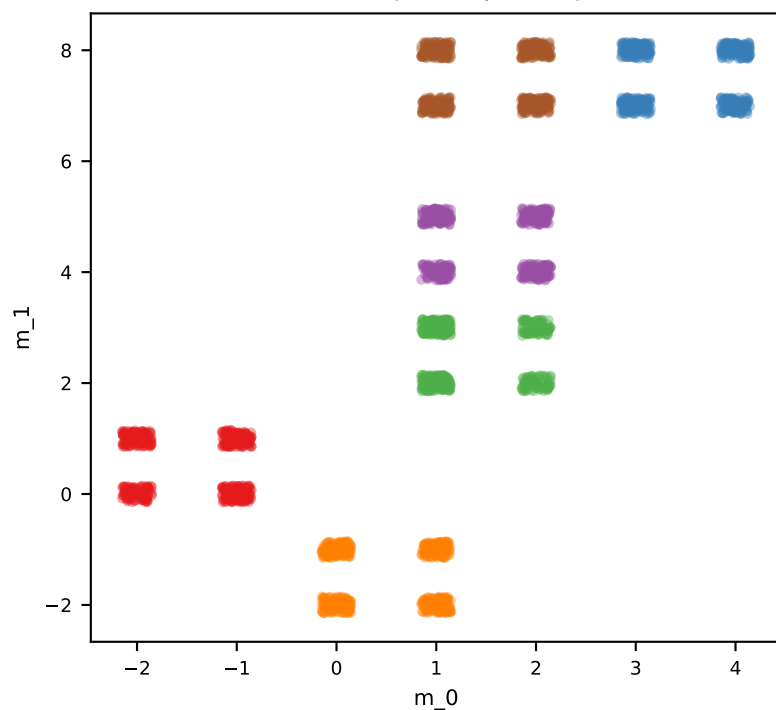

A. z-space (dim 0 vs 1)
Phase 2 ($\lambda=1e-4$, collapsed)

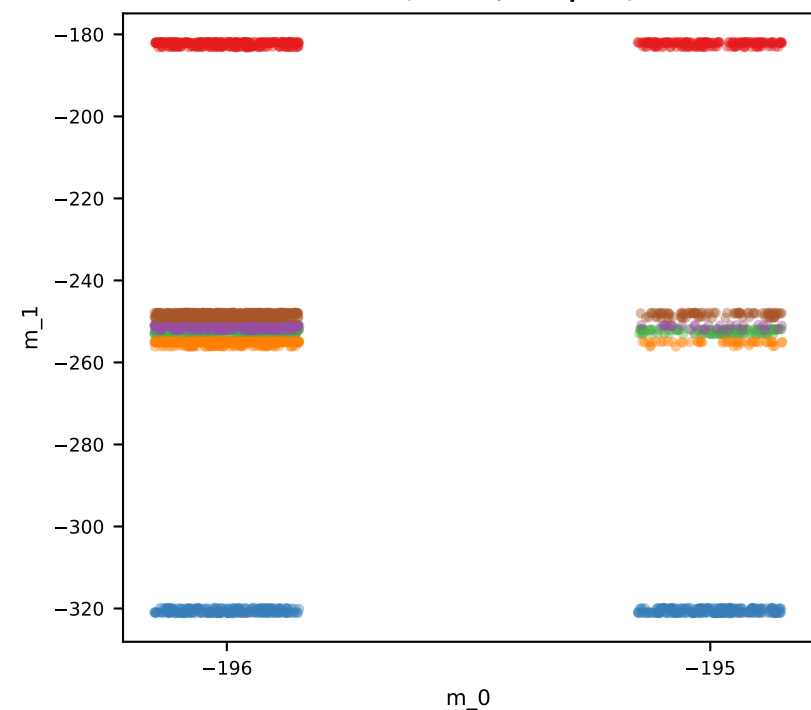

B. Message space (m_0 vs m_1)
Phase 1 (mag anchor)

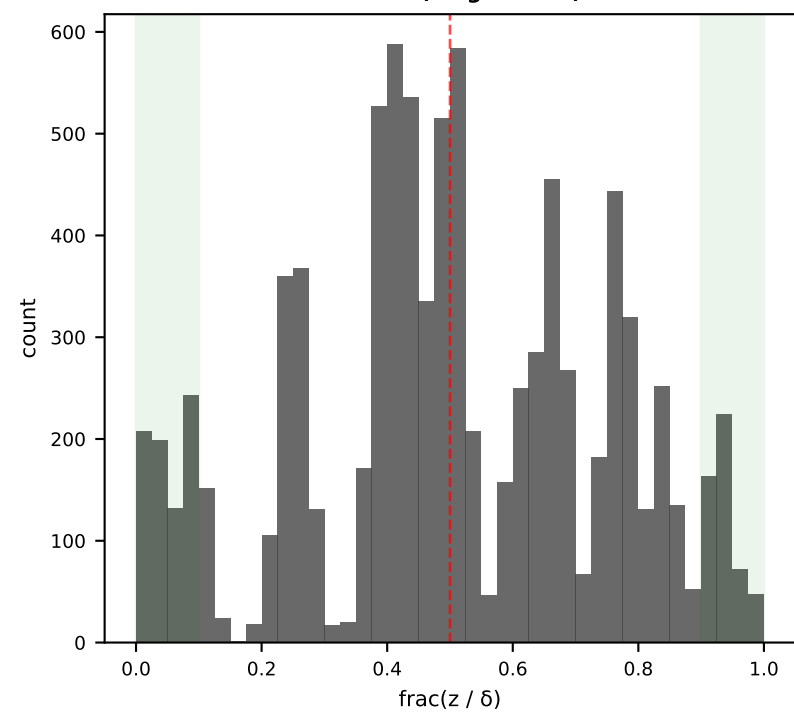

B. Message space (m_0 vs m_1)
Phase 2 ($\lambda=1e-3$, stable)

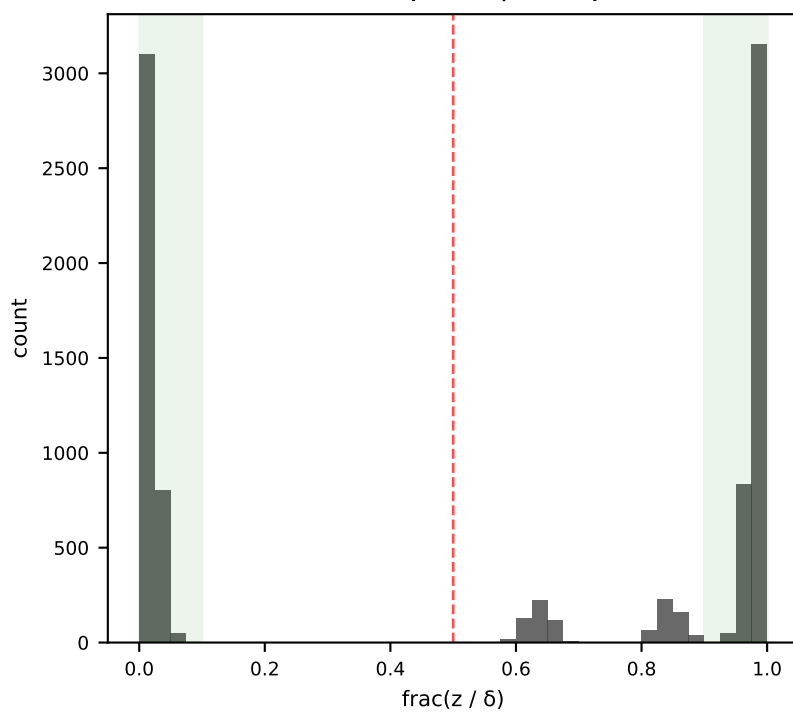

B. Message space (m_0 vs m_1)
Phase 2 ($\lambda=1e-4$, collapsed)

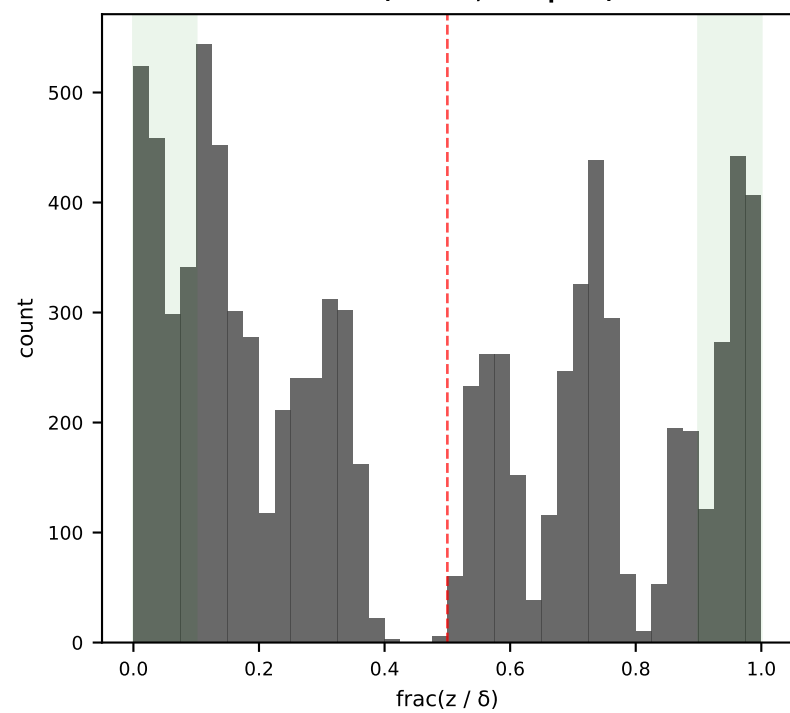

C. $\text{frac}(z/\delta)$ distribution
Phase 1 (mag anchor)

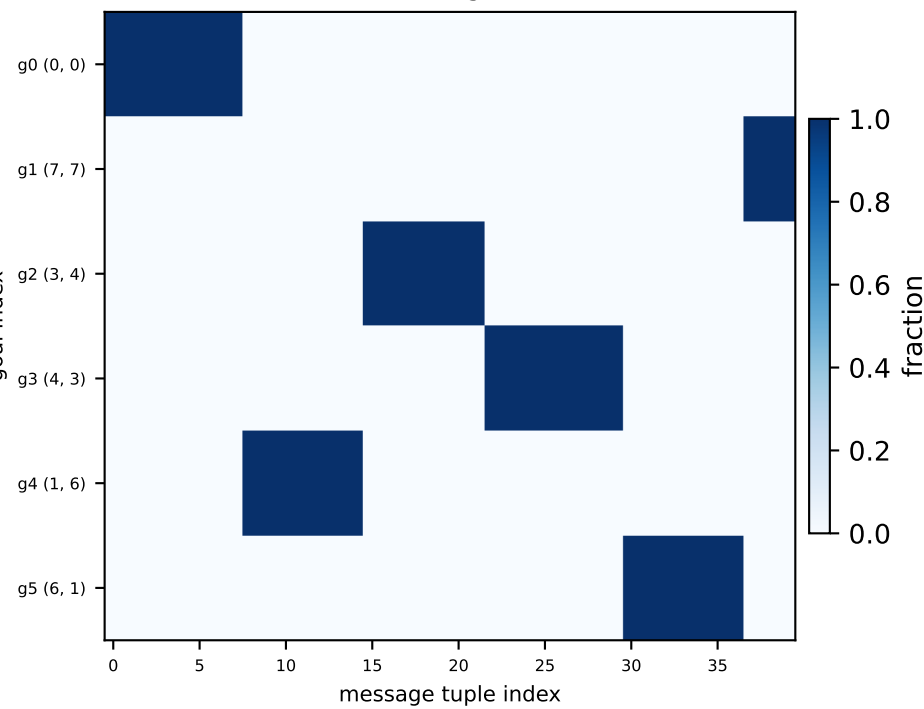

C. $\text{frac}(z/\delta)$ distribution
Phase 2 ($\lambda=1e-3$, stable)

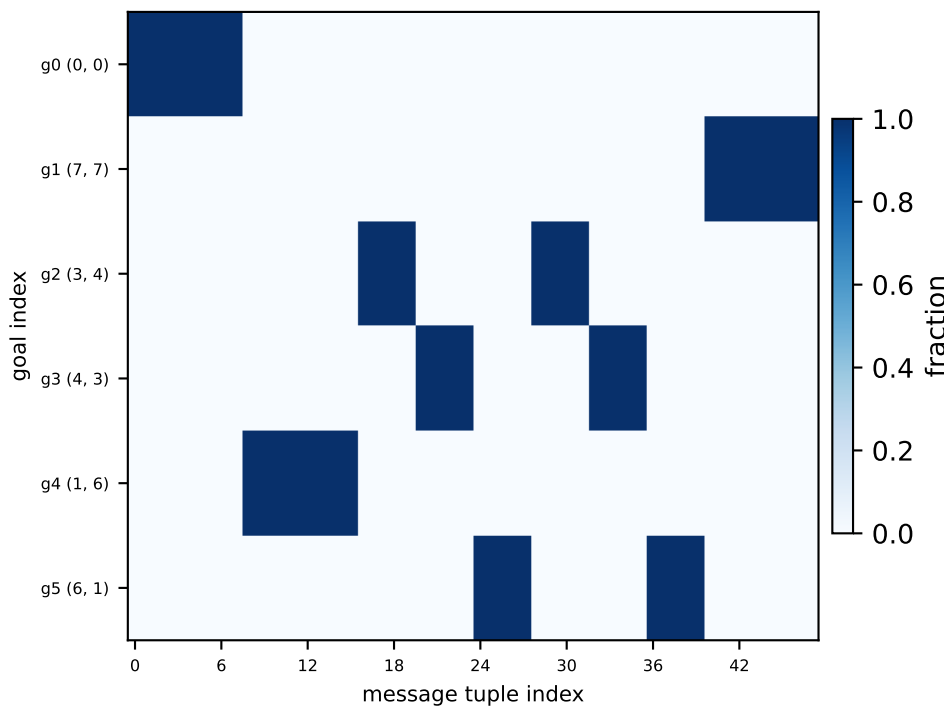

C. $\text{frac}(z/\delta)$ distribution
Phase 2 ($\lambda=1e-4$, collapsed)

D. Message-goal confusion
Phase 1 (mag anchor)

D. Message-goal confusion
Phase 2 ($\lambda=1e-3$, stable)

D. Message-goal confusion
Phase 2 ($\lambda=1e-4$, collapsed)
